Technical Profile

Result-oriented Data Engineer with a deep focus on Cloud Data Architecture and Scalable Systems. Proficient in designing and implementing high-performance ETL/ELT pipelines within the Azure ecosystem and Snowflake. Adept at bridging the gap between full-stack development and big data engineering to deliver end-to-end data-driven applications.

Professional Experience

Cognizant April 2025 – Present
Data Engineer (Full-time) & Previous Intern *PUNE*

- Architecting **Medallion Architecture** (Bronze, Silver, Gold) for healthcare data, ensuring 99% data integrity across layers.
- Developing complex orchestration workflows in Azure Data Factory (ADF) for high-volume data.
- Utilizing PySpark for distributed processing, data cleaning, and advanced feature engineering.
- Managing cloud infrastructure via ADLS Gen2 and Blob Storage, implementing optimized file formats like Parquet and Delta.
- Engineering **Snowflake** storage solutions, including data sharing, pipe-lining, and performance optimization for SQL queries.
- Operating in an **Agile/Scrum** framework using Azure Boards for task tracking, code reviews, and technical documentation.
- Facilitating legacy migrations using Informatica, ensuring seamless transition to cloud-native architectures.

Ethnus Aug 2023 – Nov 2023
MERN Stack Intern *Remote*

- Developed OnlyFIT, a health-tech platform using React.js and Node.js, focusing on user-centric design.
- Designed MongoDB schemas to handle high-frequency workout logs and implemented JWT/Bcrypt for enterprise security.
- Collaborated with cross-functional teams via Git to deploy features iteratively, ensuring high availability and responsiveness.

Relevant Projects

- **PPE Detection System:** A computer vision solution using YOLOv8 for real-time safety gear monitoring. Features an automated Telegram API bot for instant non-compliance reporting in industrial zones.
- **Emotion-Based Engine:** Integrated DeepFace with a web-based UI to analyze real-time facial expressions, mapping user moods to personalized content recommendations for mental health support.
- **Secure Password Vault:** Built a desktop security suite in Python using AES encryption, featuring a master key system and automated password entropy evaluation for local credential storage.

Technical Skills

Data Engineering: Azure (ADF, Databricks, Synapse), Snowflake, ADLS Gen2, Informatica, SQL (Snowflake SQL),Snowflake
Languages & Dev: Python (Pandas, PySpark, NumPy), React, Node.js, HTML/CSS
Tools & Automation: Azure Boards, YOLOv8, UIPath, Docker (Basics)

Education

Vellore Institute of Technology **2021 – 2025**
B.Tech in Computer Science
Chennai, Tamil Nadu,India

Ambe School **2018 – 2021**
Higher & Senior Secondary (CBSE)
Vadodara,Gujarat ,India

Certifications

- **Supervised Machine Learning** (Coursera)
- **Google Cloud Foundations & TF**
- **Pandas Data Manipulation** (Kaggle)
- **Workato Automation Professional**

Career Aspiration

- I strive to continuously improve myself in the field, always seeking opportunities to learn and grow.
- My goal is to stay updated and excel in this ever-evolving industry by contributing to high-impact, data-driven solutions.
